Subject: FW: local government entities preventing smart meter/AMI installation

I'd appreciate it if one of you could respond to Elizabeth or guide her to the correct person. Thanks.

Eric

Duh! Can you forward this to someone in Regulatory Relations who might be able to hook be up with the right people?

And Happy Holidays!

Hi Elizabeth,

Not sure why sent this to me as I continue to do CAISO work. Did you mean to send this to Erik Jacobson?

Eric

Subject: local government entities preventing smart meter/AMI installation

Hi Eric,

So Cal Gas has reported to the CPUC that, in addition to some localities' having passed measures purporting to bar the installation of smart meters and/or related equipment such as data collection units, some local government agencies have withheld ordinarily available permits to install such equipment in public and/or private areas (e.g., on an existing power or light pole).

Has PG&E had such issues? I recall one relatively public incident in which maybe the town of Fairfax passed a "no smart meters" regulation that threatened to fine or criminally prosecute PG&E employees who installed AMI equipment. My understanding was that y'all came to an understanding with the locality so that they backed down on actually enforcing the regulation. Have there been other attempts to actually implement such purported bans on AMI installation and/or withholding of permits for such installation?

If you don't know, can you point me towards who might?

Thanks much!
