Subject: Kern project subpoena power

Valerie,

At our meeting Tuesday, you asked about PG&E's ability to subpoena the Kern contractors. PG&E does not currently have the legal authority to issue subpoenas regarding the Kern incident. Once we are in litigation, we will be able to issue subpoenas, request production of records, etc. In the meantime, we are nevertheless sending requests for documents such as the post blast report to CWC, Alpha and Demtech's attorneys, but those requests have not resulted in the production of any useful documents.

We are pulling together the other information you requested Tuesday, and I will be getting back to you shortly on those outstanding items.

Regards,

Erik
