Re: *Kern Power Plant (DOI – August 3, 2013)*

Dear Gentlemen:

We are writing to you in your capacity as counsel for Pacific Gas & Electric Company (“PG & E”) concerning certain matters relating to the Kern Power Plan Project in Bakersfield, California (“Project”).

On September 3, 2013 and September 11, 2013 Redacted performed an inventory of its equipment, supplies and other materials that remain on the Project. A copy of the inventory is enclosed herewith for your reference. The inventory was limited due to the fact that certain area of the Project were not accessible. Thus, some of the information here is based on the best available information.

In light of the fact that PG & E is actively seeking approval from The California Public Utilities Commission (“PUC”) to recommence work with a replacement contractor, CWC would like to demobilize from the Project site. As part of the demobilization, CWC desires to remove from the Project site all of CWC’s property. This would include the items reflected on the enclosed inventory, as well as any additional CWC property that may not be listed therein.

As part of seeking approval from the PUC to recommence work, we are writing to request that you please submit this letter to the PUC seeking their approval for the removal of the items referenced in this letter. We also intend to submit a letter to Cal-OSHA to the same effect. Once we receive approval from PG & E, PUC and Cal-OSHA, we also intend, in advance of the removal of these items, to provide notice to the individuals referenced in your November 20, 2013 correspondence concerning the Cal-OSHA inspection.

Redacted

I look forward to hearing from you as soon as possible.

Very truly yours,

Redacted
