Subject: Spaulding Hydro Electric Powerhous

Hello,

I have been assigned to investigate an injury accident that occurred November 15, 2013 at approximately 16:15 hours. An employee fractured his lower leg while attempting to recover his hard hat as he was riding on a tram.

Information I need includes the following:

- * Which Cal-OSHA Field office responded to the incident report?
- * What is the CAL-OSHA report number? Please provide any copies received.
- * Were any fines levied? Please provide any citations issued.
- * Were drugs or alcohol involved? Please provide any associated reports.
- * Was the employee current in safety training? Please provide all current Safety Training records for the employee.

- * Were any corrective actions taken or what corrective actions are expected to be taken to prevent this from recurring? Please send all associated work orders or changes to procedures made (current or expected; with dates).

- * Why was the CPUC incident report not filed in a timely manner?

I have attached a formal document request reiterating the above.

Thank You,
James T. Cheng
CPUC Utilities Engineer. Lead Inspector
