Stephen –

I found the person we should start with – Carolyn Weiner. Would a time today at 100p-300p or tomorrow morning 1000a-1045a work for you?

I hope you are well!

yours,

sid

Subject: Research on cost of energy-saving devices

Sid,

As you saw from my e-mail exchange with Brian, I am looking into the cost of energy-saving devices so that I might prepare some calculations about the total cost of energy-related services. I am looking to you as a person outside the CPUC who may have a clear head and an eye toward reliable sources of information, including research that you have sponsored. Is there a time in the next couple of days when we could talk about this subject?
