Do they know what caused the original. Problem?

Denise

Subject: [Redacted] Update from Ed Halpin: February 8, 2014

PG&E Officers;

The purpose of this communication is to provide you with a high-level update on the progress our team continues to make to safely return [Redacted] to service.

Current Plant Status

* Unit 1 is safely operating at 100 percent power with no major issues. Our team remains on track for our 1R18

refueling outage per our schedule.

* Unit 2 is in Mode 1 and paralleled to the grid today at 3:37 a.m. Unit 2 is currently operating at 28 percent power and we will methodically – and safely – ascend to full power over the next 24 hours.

Please join me in recognizing and thanking PG&E Electric Operations for their outstanding support during 2Z18. Their professionalism, dedication and commitment should not go unnoticed and is to be commended.

We will provide you with a final update after Unit 2 safely reaches 100 percent power. You are welcome to reach out to me with any questions you may have.

Our team thanks you for your support.

Ed
