Catherine - I understand your office has a request in that we provide a copy of a presentation that PG&E gave to law enforcement agencies including the FBI and the Department of Homeland Security. I am out of the office today but I will see to it that a hard copy of that presentation be provided to you confidentially early next week. I would like to request that you keep this presentation confidential and that no copies of the deck are made. The photos and the details in this deck are very sensitive and distribution or publication could impact an ongoing criminal investigation. I would be happy to arrange for our chief of security to answer any questions you might have but we are trying to limit distribution of this sensitive material as much as we can for obvious reasons. Please forgive me in advance for taking so long to get this to you but this information had been available only on a need to know basis at PG&E and has only recently been shared with a larger circle of external law enforcement agencies.

Brian K. Cherry
