John,

This job was called in at 21:29pm. GSR arrived at 21:43. GSR [Redacted] responded to this. Upon GSR's arrival, he found the shut off valve to the furnace was shut off by the owner and the fire department had shut the gas off at the meter. GSR notified

on-call supervisor of this incident. GSR clock tested the
houeline and the houeline held. He then turned the service
back on. Since the furnace was damaged by the explosion, he
could not tell the true cause of the explosion. A good guess from
the GSR would be a delay ignition. There was no injuries, no
fire and no media.

Thanks,

Redacted

Guys,

Do you have any info on this?

Thx

John

Cpuc exec dir Paul Clanon says there was an
"exploding gas furnace" in his neighborhood last
night in the Red block of Redacted

In the city.

Do you have any info? He says no one was hurt,
but that it was "dramatic."

Thanks
Laura
