Subject: RE: Reminder and update: PG&E Gas leak optimization pilot program -- Sacramento field visit opportunities

I am thinking of Allison Brown, Commissioner Sandoval's advisor on gas matters, as well as Ditas. The 27th is Commission meeting day so I think Friday 2/28 is the best day and afternoon rather than morning. Allison is on vacation but I am putting it on her calendar. Just so you know she is just tentative.

Where should Allison and Ditas show up on Friday? You provided some instructions about shoes. Do we need to provide information to get security clearance?

Thanks

[Redacted]

Will you tell me what day from Feb 24-28 is best for Ditas?

There are basically two windows each day, morning between 8 and 12:30, and afternoon between 1 and 3:00 (work ends around 3). Plan on about 2 hours, and it's an outdoor thing.

So tell me what is best for Ditas and I will get the location details.

Thanks

Laura

Ditas and Allison

I wanted to make sure you both were aware of this opportunity to see the Picarro technology and new gas leak program in action in Sacramento Feb 24-28.

Just let me know if you have any availability.

Thanks

Laura

Good morning everyone –

I want to remind you about this opportunity to see the Picarro technology and new gas leak pilot in action in Sacramento during the week of February 24-28. Yesterday several CA Leg staffers visited and found it useful. Denise Tyrell is scheduled for Wednesday, February 26 from 10-12:30 and we have space available. A CEC contingent is scheduled to visit Friday, Feb. 28.

Bottom line is that we can accommodate your schedule if you have a chance to get to Sacramento.

Just let me know.

Thanks

Laura

You may recall that in December I told you about a gas leak detection and repair pilot program that we are rolling out, now in Sacramento, that uses the Picarro technology (mobile, car-mounted), and a cross-functional field crew team deployment. The idea is to compress the time between leak detection and repair, and improve efficiency in the process.

Several of you expressed an interest in seeing this pilot in action, and I wanted to let you know that there are opportunities in two upcoming weeks in Sacramento:

- February 10-14

and

- February 24-28

The teams will move each day, and the schedule is somewhat dynamic, but if you have an interest in visiting the sites, we can easily coordinate with you and get you to the right place.

You should plan on at least an hour, preferably two hours, for a visit. You'll be walking around outside. The best work times are between 8:00 am and 3:00 pm. We would generally like to limit visitors to around 4-5 per day, but we will definitely work to make things fit your schedule and interests.

Would you let me know if this is of interest and if there are some specific days that would likely work best for you? When you identify a date we can provide more detailed instruction on where to show up and who will be the site contact person. If you are unsure about these weeks, feel free to let me know the day before. We can accommodate last minute scheduling if

necessary.

We look forward to seeing you if your schedule allows!

Thanks

Laura
