Subject: RE: PG&E Gas leak optimization pilot program -- Sacramento field visit by Denise Tyrell and Liza Malashenko (CPUC Safety & Enforcement Division)

I just found out we are extending the Sacramento pilot into March.

Aaron -- if you can send me a March date we will try hard to make that work.

Thanks
Laura

Laura - Let's see what Denise says. Aaron -- maybe you can see her calendar/check with her. I'm guessing that we may just have to do it in SF one of those days.

Elizaveta Malashenko

Deputy Director

Office of Utility Safety and Reliability

Safety and Enforcement Division

California Public Utilities Commission

We will have to figure something else out. The Sacramento pilot is scheduled to end next week.

Is Friday afternoon an option? Ditas and Alison are coming then. And the Energy Division team is coming over on Thursday. Otherwise, perhaps we can just schedule something in SF that demonstrates the Picarro technology. That's just one part of the pilot, but it's good to see the technology.

Laura,

Hi – Denise and I can't make the Gas leak optimization next week. We both need to be in a meeting in San Francisco that's not movable. Can you re-schedule us for some time in March?

Thanks,

Liza
