Subject: RE: NTSB Safety Study

We will just let you know when the logistics are nailed down.
Thanks

Laura,

I'm not sure who specifically in SED will be attending. We did receive a similar request from NTSB, but haven't planned out the details.

Thanks,

Liza

Liza

This is the NTSB visit I mentioned today. Let me know who from your team will attend if you can.

Thanks

Laura

Subject: NTSB Safety Study

Nathan Doble (Transportation Research Analyst) from the NTSB called me earlier this week to discuss a safety study the NTSB is conducting related to Transmission Integrity Management. Here are my notes from the meeting.

- The NTSB conducts safety studies on topics at a high level, the results of which are generally safety recommendations targeted at federal and state regulators and standards bodies
- The NTSB is currently undertaking a study of Transmission Integrity Management
- He is hoping to make a visit to PG&E in the next month or so, along with representation from the CPUC, to ask questions about how we are implementing TIMP

• [REDACTED] The areas of focus will include:

- HCA Identification
- Threat Identification
- Risk Assessment
- Data Integration
- GIS Capabilities and Support

• [REDACTED] He is also curious about how PG&E's TIMP program has evolved since San Bruno

• [REDACTED] They plan to spend a day or so with us the week of March 17th

PG&E is committed to protecting our customers' privacy.
