Subject: RE: PG&E inquiry on pricing trends for various technologies

Thank you, this is very helpful. We have found a group within ACEEE called Appliance Standards Awareness Project (ASAP) that seems to be the place to go. Sorry to admit, I've been sidetracked from this project onto something else of much less importance but greater urgency. So, I'm working on that instead for a few days at least. Once again, thanks,

**Subject:** FW: PG&E inquiry on pricing trends for various technologies

Hi Sid/Steve,

Sorry for the delay but I did want to follow up with some additional information that might be

useful. This short report provides some external resources you might want to look at in evaluating pricing trends for various technologies in the market. There isn't much documented in public reports at the moment as mentioned earlier but here's what I could have a partner of ours find (for non-lighting technologies).

Best Regards,
