Meredith:

Thank you for the edits and comments. I will definitely mention the \$100 Million, which is a significant amount of money. The security issues we found during our audits have been broken fences, an unlocked gate and maybe a broken sensor on a fence (checking). From talking to my staff they have not been PG&E issues.

Ray,

Attached are the slides with revisions in red. The \$15.4 million is the correct number. There are also changes to the damage to substation picture, which are not in red. Also, I think it would be helpful to mention that PG&E is planning to spend approximately \$100 million over the next four years on substation security for the highest priority facilities on measures, such as those mentioned on the last slide.

Also, do you have information on the security issues that were identified in the audits that you can send to me or can we discuss? It would be helpful to provide that information to our substation and security departments.

Please let me know if you have questions or need additional information.

Thanks,
Meredith

Meredith:

I have to turn the presentation in on Tuesday for the Commission meeting, so Monday at noon will work. However, I will be sending the draft to Denise Tyrrell (acting director) and Liza today for comments, but I will let them know that I am checking with sources about some of the information.

Ray,

Thanks for the opportunity to review. I discussed with our security team late today and they had some corrections/suggestions. I also would like to check in with our Ops folks on the damage number and presentation. Would it work to provide you with feedback by Monday at noon or do you need by tomorrow? I'm hoping to get it to you by tomorrow but just in case folks aren't available.

I will also let you know on the President Peevey question.

Meredith

Attached is the draft presentation I plan to give next week at the Commission meeting. Please let me know if there is anything stated PG&E has issues with me presenting. Also, I was not sure on the total value of damage, so that is why it is red, if you have a better number please let me know. Just and FYI, next Wednesday, I will be briefing President Peevey on security, which will cover more of the San Jose DOE/DHS/PG&E meeting last week and if there is something PG&E thinks I should let Peevey know, let me know.
