Hi Aaron!

Good to be in touch with you again . . .

Can you see when Denise might be able to get to Sacramento and spend a couple hours in the field to observe a pilot program we are running there? It should happen any time between 8:00 am and 1:30 pm (work ends around 3:00 for these teams).

Once I know when she's available, I will provide you with more details about the specific location, contact person at the site, etc.

Thanks

Laura

Best to work with Aaron. Mid week should work.

Thank you.

Denise

Denise

This is great. Shall I work with Aaron to get a day that works for you in the Feb 24-28 slot? Or do you just know your preference?

Laura

**Subject:** PG&E Gas leak optimization pilot program -- Sacramento field visit opportunities

You may recall that in December I told you about a gas leak detection and repair pilot program that we are rolling out, now in Sacramento, that uses the Picarro technology (mobile, car-mounted), and a cross-functional field crew team deployment. The idea is to compress the time between leak detection and

repair, and improve efficiency in the process.

Several of you expressed an interest in seeing this pilot in action, and I wanted to let you know that there are opportunities in two upcoming weeks in Sacramento:

- February 10-14

and

- February 24-28

The teams will move each day, and the schedule is somewhat dynamic, but if you have an interest in visiting the sites, we can easily coordinate with you and get you to the right place.

You should plan on at least an hour, preferably two hours, for a visit. You'll be walking around outside. The best work times are between 8:00 am and 3:00 pm. We would generally like to limit visitors to around 4-5 per day, but we will definitely work to make things fit your schedule and interests.

Would you let me know if this is of interest and if there are some specific days that would likely work best for you? When you identify a date we can provide more detailed instruction on where to show up and who will be the site contact person. If you are unsure about these weeks, feel free to let me know the day before. We can accommodate last minute scheduling if necessary.

We look forward to seeing you if your schedule allows!

Thanks

Laura
