Subject: RE: Drought Data Request

Most of question 8 should be subsumed in question 9, but the basic idea if local communities are coming to you about any issues that are impacted their communities – we would like to know, to the extent possible – knowing that PG&E is a large organization and that this information may be difficult to collect. So, for example, if communities are contacting you about water levels, recreational issues, etc. it would be good to note it. Hope this helps.

Thanks Michele- I am in receipt of this data response, and we're starting to pull together the information you've requested.

I did have one question on Q8, which asks about local impacts of the drought. Impacts on power generation and on reliability are covered elsewhere in the data request, so what local impacts are you thinking of here? If you could provide me with an example, I can then make sure I direct the question to the right place for a response.

Thanks,

Sujata

Sujata,

Attached is the data request regarding drought conditions that I discussed with Erik. If you have any questions, please do not hesitate to contact me.

Thanks in advance,

Michele Kito

Michele,

I forgot to mention that I will be out of the office until February 13th. Could you please send the drought data request to Sujata Pagedar? She can make sure we respond on a timely basis.

Thanks,

Erik
