Hi Sujata	,
I was hop	sing that I could augment the data request with one additional question:
Question	10:
occurred,	ovide PG&E's lowest hydroelectric production in GWh, the year in which this and whether this figure includes PG&E owned hydroelectric generation, etric contracts or both.
Thanks!

Most of question 8 should be subsumed in question 9, but the basic idea if local communities are coming to you about any issues that are impacted their communities — we would like to know, to the extent possible — knowing that PG&E is a large organization and that this information may be difficult to collect. So, for example, if communities are contacting you about water levels, recreational issues, etc. it would be good to note it. Hope this helps.

I did have one question on Q8, which asks about local impacts of the drought. Impacts on power generation and on reliability are covered elsewhere in the data request, so what local impacts are you thinking of here? If you could provide me with an example, I can then make sure I direct the question to the right place for a response. Michele,
I forgot to mention that I will be out of the office until February 13 th . Could you please send the drought data request to Sujata Pagedar? She can make sure we respond on a timely basis.
Thanks,
Erik
