Subject: City review of shoring report required

Steve,

I conferred with the City Building Official yesterday late in the day.

The City Building Safety staff will need to review a copy of the structural engineer's shoring analysis and recommendations or report. Building and Safety staff will need to review and approve this report prior to authorizing continued investigation activities and on-site presence by personnel other than the structural engineering team, debris clean-up staff, and structural shoring staff. Please submit this report to John Kuehl, Contract City Building Official, and Paul Abadilla, Contract Building Inspector.

Also, please pass along Gordon Solomon's number, as we discussed. Thank you.

Subject: Re: authorization to enter posted site for PGE investigation team

Mike and Rob,

All personnel have vacated the site for the day. I have ensured the perimeter is secure.

Tomorrow I will have building contractors on site to shore up the structure to allow our investigation on the topside to continue safely. They will also make the exterior yard area safe to the public by taking down structures imbedded in the trees and such.

I will send the individual names when I receive them tomorrow after 10:00.
Thank you for your assistance and patience.

Thanks for your call earlier this morning. This is confirmation that PGE's forensic investigation team has authorization from the City to enter the site at the Redacted that is currently fenced and posted for no entry.

My understanding from you is that today, the following PGE and Exponent staff will need access to the site:

PGE Staff - Redacted and yourself Redacted
Exponent staff - Redacted

As I mentioned, Chief Mike Calhoun (email above) and I would like daily updates via email including any changes to the personnel that need access to the site. Chief Calhoun's cell phone number is Redacted if you need to reach him.

I have also copied Jason Stilwell, our City Administrator; Susan Paul, our Administrative Services Director; John Kuehl, our Building Official; and Paul Abadilla, our Building Inspector, for their information. If you need to make alterations with the site security fence to facilitate access, please let me know.

If you note any non-authorized personnel entering or trying to enter the site, please contact Chief Calhoun or other personnel from the Police Department right away.

Below is my contact information. Thank you.
