

## Data Request #1 to PG&E

[Request Due Date: March 13]

1. For all of PG&E's proposed change in its DR programs (BIP, DBP, SmartAC, and AutoDR), please provide a redline version on exactly what changes PG&E proposed to make in the tariff sheet. This would provide much clarification to Energy Division staff.
2. PLS – What was the administration cost approved for 2012-2014? Is PG&E requesting \$1.5 million for PLS (as indicated in Table 5, pg 13) or is that a Typo? D.12-04-045 approved \$14M for 2012-2014, not \$15M as PG&E indicated in Table 5.
3. Smart Rate – Please provide a list of climate zones that PG&E serves.
4. AMI – MCE stated in their comments that they have not been receiving AMI data for their customers' usage from PG&E in a timely manner, as PG&E is obligated to do as MCE's Meter Data Management Agent. Can you please explain why this is happening and what can be done to rectify the situation?
