Subject: Aldyl A Data Request 3

Raymond:

This is Data Request 3 on Aldyl A plastic pipes. Please have Redacted run the Jana Aldyl A calculator with the following parameters for each year from 1972 to 2072 and display the results on an Excel spreadsheet:

LDIW

Soil temp: 60 deg. F

Installation year: 1971

Operating pressure: 60 PSI

Since Data Request 3 is very straight forward and since your team is still preparing the response for DR2 (expected to be ready by tomorrow, as Redacted told me), I think perhaps Red can prepare this spreadsheet for DR3 by tomorrow and send it along with the response to DR2. If you think response to DR3 can not be done by tomorrow, please let me know. Thanks.
