Subject: FW: SF Dig in [Redacted]

FYI -- Dig-in in San Francisco on distribution system. Now under control, with ~40 customers still out of service, but restoration expected around 8:00 tonight.

Subject: SF Dig in - [Redacted]

At approximately 3:30, SFFD reported on site at [Redacted] on a leaking gas situation. Streets were closed off, gas crews arrived and isolated the main at 4:05 by squeezing at two locations on a 2" plastic main. A 3" plastic service (transferred from low pressure system) was damaged. A total of 5 gas services were interrupted with approximately 40 residential customers. Repairs underway with restoration expected around 8:00 PM due to large diameter service pipe. USA status is being investigated now. 3rd party contractor unknown at this moment.
