Subject:	follow-up on new EV building code
Ed, Greg	and Sid,
	ioned this to each of you individually. Attached are the draft EV ready building. These are for new single family and multifamily buildings (starting 7/1/15).
BSC Greethis Thursday langu	bllowing this process closely but here is what was told to me regarding process: The en Building Advisory Committee will review and comment on these draft regulations sday. After the advisory committee meeting, HCD will then develop a formal set of 45 tage and submit to BSC for processing and more public comment. If all goes well, the package with any future amendments will go before the full BSC at their meeting in doption.
informal contact or concern f panel/dist	ncourage you to review these. I'm not sure if this means formal comments or more engagement but Bob Raymer at the CA Building Industry Association is a good in this and you may want to be in touch with him. (rraymer@cbia.org) The key from the building industry, I believe, is what will be the costs, from the utility side for tribution system build out, may be associated with the new standards. Is this going to cost for builders?
Thank yo	u so much,
Jen	

Kalafut, Jennifer
