

Improved Reliability, Long-Term Benefits

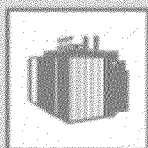

PG&E's **Cornerstone Project** has led to improved electric reliability for customers over the last three years. In fact, reliability reached a new record in 2013. Here are some Cornerstone accomplishments:

Intelligent switches added to more than 500 electrical circuits help avoid 230,000 customer interruptions

5,000 sets of fuses and 500 line reclosers added to 440 rural circuits

Upgrades to multiple substations improve both restoration times and capacity
