Subject: PG&E FRACMOO Comments

Marcelo,

I thought you would be interested in the attached comments that Roy Kuga made at the CAISO Board meeting last Thursday. They address the CAISO's FRAC-MOO proposal and the issue we discussed last week about how the CAISO proposal will not allow Helms' pumping to count toward the flexibility requirement. PG&E will probably protest CAISO's filing at FERC on this issue.

Best regards,

Erik
