I left a message on your personal cell. You didn't get it ?

It is regarding the nasty-gram we got from Clanon regarding our ham-handed non-implementation of mandatory TOU rates for Ag customers effective March 2014. We found out a week prior that notice was never given to customers (45 days under the decision) so we sent a letter to Paul asking for an extension. My bad is that they

asked for a one-year extension – which in retrospect – I should have pushed back on. Anyway, Paul’s letter said that we would be out of compliance until such time that we fixed it between now and March 2015. After much discussion internally, we are going to notice customers that the March 1 date they were expecting won’t happen now until June 15 or so (date still to be determined). You had a meeting with Roscow and Clanon. Does that ring a bell ?

I never got the message. What does this mean?

**Subject:** Ag Implementation

Ed – left a message a few days ago. We will probably start notifying the 4700 AG Customers on Monday about transitioning them to mandatory TOU rates effective June 15 or so. Happy to chat about it today at the PUC.
