Meeting number: 743 091 843

Meeting password: reliability

Purpose

At this workshop, California Public Utilities Commission (CPUC) staff will present and facilitate party presentations and informal comment on issues scoped under “Track One” in the Preliminary Scoping Memo for Proceeding R.14-02-001. Staff plans to address high level policy questions relevant to the Commission’s consideration of a multi-year forward Resource Adequacy requirement.

Staff expects presentations to cover policy issues such as:

- current electric system reliability needs and concerns in California,
- recent developments in the area of system reliability,
- multi-year forward procurement as a potential solution to reliability concerns, and
- the potential impacts of implementation of an expanded Resource Adequacy program.

A Workshop Summary will be transcribed.

A draft agenda for the workshop will be released prior to the workshop. If you have any questions, please contact:

Meredith Younghein
