Subject: Re: Proposed Substation Schedule

Ray,

Thank you for the opportunity to provide comments on the agenda. Overall, it looks good. PG&E's suggestions on Day 1 are below. We do not have any comments on the Day 2 agenda.

- Metcalf: This overview should be limited to 20 minutes. We have recently made public presentations on this incident and 20 minutes has been sufficient to provide a high level overview.
- NERC Presentation: We recommend that both PG&E and SCE make the presentation on the NERC standards and cover the Q&A.
- Cyber: We do not believe that there should be a separate panel on cyber. It is already a very full day with the discussion on physical.

Please let me know if you would like to discuss or have questions.

Best regards,

Meredith

**Subject:** Proposed Substation Schedule

John and Meredith:

Attached is a draft schedule for the substation event that SED is planning on holding. Please send me your comments by April 23 if possible.

Here is my train of thoughts on the schedule and questions.

- Opening comments from a Commissioner or Paul Clanon
- Followed by a two presentations one on the Metcalf event and then the NERC standards
  - The Metcalf so people know why we are here and what happened
  - The NERC standards to show that something is being done
    - Is SCE or PG&E willing to make this presentation?
- After the presentations there would be a Q&A about the NERC standards
  - Would it be possible to have somebody from each utility be available to answer questions?
- Panel discussion on standards and security.
  - Is there a benefit or to having two panels, one physical and one cyber?

Also, the second day's agenda would not be made public, nor will I post it on the daily calendar. Thank you for your time and please feel free to contact me if you have any questions.

Ray
