Subject: RE: Gas Transmission IM Notifications "under review" for CA State Program

Banu,

My sincere apologies regarding the delayed response as I was in an all-day meeting today. The ECDA validation associated with 2.62 miles does not include any segments on StanPac. This pipeline is primarily assessed via ILI.

Please let me know if you require additional information or would like to discuss further.

Thank you.

Sumeet

Hi Sumeet,

I'd like to talk to you about PG&E's IM issues this morning if you have time.

Can you please call me at 916-616-9403 when you get a chance? One of the questions that I need to get an answer urgently is that whether or not any segments of the transmission lines that is required to be validated (out of the 2.62 miles) is a segment of Stan Pac pipelines?

Thank you, Sumeet,

Banu

Banu,

Per our discussions and your request, attached is the e-mail transmittal associated with item 321 referenced below.

Please let me know if you need any additional information.

Thank you.

Michael,

At your earliest convenience, please review the notifications below, and let us know if the CA PUC has concerns.

It is important for us to process these notifications in a timely manner.
