**APRIL 2014 RENEWABLES PORTFOLIO STANDARD  
PROJECT DEVELOPMENT STATUS REPORT OF  
PACIFIC GAS AND ELECTRIC COMPANY (U 39 E)  
(PUBLIC VERSION)**

**I. INTRODUCTION**

Pacific Gas and Electric Company (“PG&E”) hereby serves its April 2014 Renewables Portfolio Standard (“RPS”) Project Development Status Report (“PDSR”) in accordance with the California Public Utilities Commission’s (“Commission”) RPS reporting requirements.<sup>1/</sup>

**II. MATERIALS INCLUDED IN THIS FILING**

The PDSR template requires PG&E to submit certain confidential, market-sensitive information for Commission review. PG&E has redacted this information from the Public Version of the PDSR pursuant to the Commission’s rules for protecting the confidentiality of market-sensitive energy procurement information.<sup>2/</sup> The redacted Public Version of the PDSR, accompanied by confidentiality declaration seeking protection of the confidential data, is

---

<sup>1/</sup> See Data Request from Edward Randolph, Director of the Commission’s Energy Division to large investor-owned utilities, dated February 27, 2014 (providing a template for the PDSR and requiring service of the public version of the PDSR on the service list for R.11-05-005 on April 1, 2014, and an electronic version of the confidential PDSR e-mailed to Energy Division at the same time); D.06-05-039 at 22-23 (PDSR Requirement under the 20% RPS Program).

<sup>2/</sup> See D.06-06-066; D.08-04-023.

attached as Appendix A. PG&E is concurrently submitting the Confidential Version of the PDSR to the Energy Division in compliance with the instructions tab in the PDSR template.

Respectfully submitted,

M. GRADY MATHAI-JACKSON  
CHARLES R. MIDDLEKAUFF

**VERIFICATION**

I am an employee of PACIFIC GAS AND ELECTRIC COMPANY, a corporation, and am authorized to make this verification on its behalf. I have read the foregoing “APRIL 2014 RENEWABLES PORTFOLIO STANDARD PROJECT DEVELOPMENT STATUS REPORT OF PACIFIC GAS AND ELECTRIC COMPANY (U 39 E) (PUBLIC VERSION)” dated April 1, 2014. The statements in the foregoing pleading are true of my own knowledge, except as to matters which are therein stated on information and belief, and as to those matters I believe them to be true.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on this 1st day of April, 2014 at San Francisco, California.

**/s/ Garrett P. Jeung**

Garrett P. Jeung  
Senior Director, Renewable Energy  
Pacific Gas and Electric Company

**DECLARATION OF GARRETT P. JEUNG  
SEEKING CONFIDENTIAL TREATMENT  
FOR DATA AND INFORMATION  
CONTAINED IN THE PROJECT DEVELOPMENT STATUS REPORT SUBMITTED  
APRIL 1, 2014  
(PACIFIC GAS AND ELECTRIC COMPANY - U 39 E)**

I, Garrett P. Jeung, declare:

1. I am presently employed by Pacific Gas and Electric Company (“PG&E”), and have been an employee at PG&E since 2003. My current title is Senior Director within PG&E’s Energy Procurement organization. In this position, my responsibilities include managing a department that is responsible for renewable energy procurement and development. In carrying out these responsibilities, I have acquired knowledge of PG&E’s contracts with numerous counterparties and have also gained knowledge of the operations of electricity sellers in general. Through this experience, I have become familiar with the type of information that would affect the negotiating positions of electricity sellers with respect to price and other terms, as well as with the type of information that such sellers consider confidential and proprietary.

2. Based on my knowledge and experience, and in accordance with Decision (“D.”) 08-04-023 and the August 22, 2006 “Administrative law Judge’s Ruling Clarifying Interim Procedures for Complying with Decision 06-06-066,” I make this declaration seeking confidential treatment of certain information and data contained in the Project Development Status Report submitted on April 1, 2014.

3. Attached to this declaration is a matrix identifying the data and information for which PG&E is seeking confidential treatment. The matrix specifies that the material PG&E is seeking to protect constitutes the particular type of data and information listed in Appendix 1 of D.06-06-066 and Appendix C of D.08-04-023 (the “IOU Matrix”), or constitutes information

that should be protected under General Order 66-C. The matrix also specifies the category or categories in the IOU Matrix to which the data and information corresponds, if applicable, and why confidential protection is justified. Finally, the matrix specifies that: (1) PG&E is complying with the limitations specified in the IOU Matrix for that type of data or information, if applicable; (2) the information is not already public; and (3) the data cannot be aggregated, redacted, summarized or otherwise protected in a way that allows partial disclosure. By this reference, I am incorporating into this declaration all of the explanatory text in the attached matrix.

I declare under penalty of perjury, under the laws of the State of California, that to the best of my knowledge, the foregoing is true and correct. Executed on April 1, 2014, at San Francisco, California.

PACIFIC GAS AND ELECTRIC COMPANY

Document: April 2014 Project Development Status Report of PG&E

IDENTIFICATION OF CONFIDENTIAL INFORMATION PER DECISION 06-06-066, DECISION 08-04-023 and General Order 66-C

Date: April 1, 2014

Redaction Reference	(1) The material submitted constitutes a particular type of data listed in the Matrix, appended as Appendix 1 to D.06-06-066 and Appendix C to D.08-04-023  (Y/N)	(2) To which category or categories in the Matrix do the data correspond?	(3) That it is complying with the limitations on confidentiality specified in the Matrix for that type of data  (Y/N)	(4) That the information is not already public  (Y/N)	(5) The data cannot be aggregated, redacted, summarized, masked or otherwise protected in a way that allows partial disclosure  (Y/N)	PG&E's Justification for Confidential Treatment	Length of Time
<p>Rows 40, 58, 60, 61, 64, 76, 69, 80, 81, 85-88, 98, 102, 112, 122, 123, 137-139, 146, 148, 156, 159, 160, 171, 177-180, 194, 196, 198, 200, 202, 203, 209, 216, 219, 227, 242, 244-246, 250-254, 256-258, 354, 387-396, 298-401</p> <p>Columns AX, AY (grey shaded area only)</p>	<p>Yes</p>	<p>Item VII (un-numbered category following VII G) Score sheets, analyses, evaluations of proposed RPS projects.</p> <p>Item VIII B) Specific quantitative analysis involved in scoring and evaluation of participating bids.</p> <p>General Order 66-C.</p>	<p>Yes</p>	<p>No. PG&amp;E has modified its confidentiality criteria, resulting in the potential that some previously disclosed cells in columns F, G, and H are now redacted.</p>	<p>Yes</p>	<p>This data contains bid/offer information and analysis and evaluation of participating bids for offers that are currently shortlisted and under negotiation and for offers that were under negotiation but are no longer. Disclosure of this information would provide valuable market sensitive information to competitors and could damage ongoing and future negotiations by providing information about other potential renewables projects.</p> <p>I am informed and believe that General Order 66-C provides a basis for confidential treatment. General Order 66-C includes in its category of records not open to public inspection "Information obtained in confidence from other than a business regulated by this Commission where the disclosure would be against the public interest." (Paragraph 2.8). It is in the public interest to treat such information as confidential because if such information is released, it could impair negotiations with other offers.</p>	<p>For information covered under VII (unnumbered category following VII G), remain confidential for three years from the 2/10/14 cut-off for this analysis.</p> <p>For information covered under Item VIII B), remain confidential for three years after winning bidders selected.</p> <p>For information covered by General Order 66-C, remain confidential until no longer protected pursuant to the provisions of G.O. 66-C.</p>

<p>Columns AK, AZ, BA, BC (grey shaded area only)</p>	<p>Yes</p>	<p>Item VII F) Renewable Resource Contracts under RPS program - Contracts without SEPs</p> <p>VII G) Renewable Resource Contracts under RPS program - Contracts without SEPs</p> <p>Item VII (un-numbered category following VII G) Score sheets, analyses, evaluations of proposed RPS projects.</p> <p>General Order 66-C.</p>	<p>Yes</p>	<p>No. PG&amp;E has modified its confidentiality criteria, resulting in the potential that some previously disclosed cells in column AK are now redacted.</p>	<p>Yes</p>	<p>This data contains information regarding the terms of RPS PPAs and PSAs between PG&amp;E and various counterparties and analyses and evaluations of these RPS projects. Disclosure of this information would provide valuable market sensitive information to competitors and could damage ongoing and future negotiations by providing information about other potential renewables projects. Furthermore, the counterparties to the PPAs and PSAs have an expectation that the terms of the PPAs and PSAs will remain confidential pursuant to confidentiality provisions in the PPAs and PSAs.</p> <p>I am informed and believe that General Order 66-C provides a basis for confidential treatment. General Order 66-C includes in its category of records not open to public inspection "Information obtained in confidence from other than a business regulated by this Commission where the disclosure would be against the public interest." (Paragraph 2.8). It is in the public interest to treat such information as confidential because if such information is released, it could impair negotiations with other offers.</p>	<p>For information covered under Item VII F) and VII G) remain confidential for three years after the date on which the contract states that deliveries were to begin, or until one year following expiration, whichever comes first.</p> <p>For VII (un-numbered category following VII G), remain confidential for three years from the 2/10/14 cut-off for this analysis.</p> <p>For information covered by General Order 66-C, remain confidential until no longer protected pursuant to the provisions of G.O. 66-C.</p>
---	------------	--	------------	---	------------	--	---

<p><b>Columns U, AP, AQ,</b></p> <p><b>Columns O, P, Q, AI, AJ, AL, AM,</b></p> <p><b>AOBD-BT (grey shaded area only)</b></p>	<p>Yes</p>	<p>Item VII (un-numbered category following VII G) Score sheets, analyses, evaluations of proposed RPS projects.</p> <p>Corresponds to General Order 66-C.</p>	<p>Yes</p>	<p>No. PG&amp;E has modified its confidentiality criteria, resulting in the potential that some previously disclosed cells in column AL are now redacted.</p>	<p>Yes</p>	<p>The information in these cells constitutes PG&amp;E's analysis and evaluation of the current development status of the RPS projects in its portfolio or constitutes commercially sensitive, proprietary, or personally-identifiable information that should be withheld from public disclosure under General Order 66-C paragraph 2.8. Some examples include whether a particular project is on schedule to meet its construction start date and its commercial operations date; whether a given project may have problems gaining necessary permits from the relevant agencies; whether a project has site control, specific site information; and details of the developer's status.</p> <p>There are several reasons why it is in the public interest to protect the confidentiality of this information. First, disclosure of this information could discourage developers from frankly communicating project status to PG&amp;E, and thus undermine PG&amp;E's ability to adequately monitor RPS development progress. Second, PG&amp;E's counterparties oppose making this information public. If this information is not protected, developers may not respond to PG&amp;E's solicitation for bids, impairing PG&amp;E's ability to increase its procurement of renewable energy resources. Third, the release of this information may result in developers' increasing project costs in the future to compensate for competitive harm resulting from disclosure. Fourth, it is also in the public interest to protect the confidentiality of this information to ensure a vibrant, viable, competitive market for renewable energy supplies. Disclosure of this information would provide valuable market sensitive information to competitors and could damage ongoing and future negotiations by providing information about other potential renewables projects.</p>	<p>For VII (un-numbered category following VII G), remain confidential for three years from the 2/10/14 cut-off for this analysis.</p> <p>Remain confidential until no longer protected pursuant to the provisions of G.O. 66-C.</p>
---	------------	--	------------	---	------------	--	--

<p><b>Columns BU-CI (grey shaded area only)</b></p>	<p>Yes</p>	<p>Item VII (un-numbered category following VII G) Score sheets, analyses, evaluations of proposed RPS projects.</p> <p>General Order 66-C.</p>	<p>Yes</p>	<p>Yes</p>	<p>Yes</p>	<p>This data contains score sheets, analyses and evaluations of proposed RPS projects between PG&amp;E and various counterparties. In particular, it contains PG&amp;E's assessments about the progress and viability of renewables projects. If this information is not protected, developers may not respond to PG&amp;E's solicitation for bids, impairing PG&amp;E's ability to increase its procurement of renewable energy resources. In addition, release of this information may result in developers increasing project costs in the future to compensate them for competitive harm resulting from disclosure, and could discourage developers from frankly communicating project status to PG&amp;E and thus undermine PG&amp;E's ability to adequately monitor RPS development progress. Disclosure of PG&amp;E's assessments regarding project progress and viability could also hinder developers' abilities to obtain financing, which could lead to project failure, and, ultimately, reduce the amount of renewable energy available to customers. Finally, in Decision 09-06-018, the Commission found that project-specific viability information should not be made public.</p> <p>I am informed and believe that General Order 66-C also provides a basis for confidential treatment. General Order 66-C includes in its category of records not open to public inspection "Information obtained in confidence from other than a business regulated by this Commission where the disclosure would be against the public interest." (Paragraph 2.8). It is in the public interest to keep the information in these columns confidential for the reasons stated above. It is also in the public interest to protect the confidentiality of this information to ensure a vibrant, viable competitive market for renewable energy supplies. Disclosure of this information would provide valuable market sensitive information to competitors and could damage ongoing and future negotiations by providing information about other potential renewables projects.</p>	<p>For VII (un-numbered category following VII G), remain confidential for three years from the 2/10/14 cut-off for this analysis.</p> <p>For information covered by General Order 66-C, remain confidential until no longer protected pursuant to the provisions of G.O. 66-C.</p>

CPUC ID	Text	No Drop Down	• Provided by CPUC	• Provided by CPUC (usually "AB 1969")	• Provided by CPUC		Y	
IOU ID	Text	No Drop Down	• CM Log Number	• CM Log Number	• Obtain Contract ID from Database		N	
IOU Contact Person (name, e-mail, phone number)	Text	No Drop Down	• Contract Manager for projects that are executed, terminated, or rejected after execution	• Contract Manager assigned to FITs	• Transactor for projects that are shortlisted, under negotiations, or terminated prior to execution.		N	
Project Name	Text	No Drop Down	• Same methodology as for March filing.	• Same methodology as for March filing.	• Same methodology as for March filing.		N	
Special Purpose Entity	Text	No Drop Down	• Name of the entity established for the project (i.e. LLC)	• Name of the entity established for the projects (i.e. LLC) • Enter "N/A" if unknown	• Name of the entity established for the projects (i.e. LLC)		N	
Primary Developer	Text	No Drop Down	• Developer with highest percentage interest in the project • Parent company unless wholesale aggregated contract. • If wholesale aggregated contract, input name of aggregator (e.g., Shell, Barclays etc.)	• Developer with highest percentage interest in the project	• Developer with highest percentage interest in the project • Parent company unless wholesale aggregated contract. • If wholesale aggregated contract, input name of aggregator (e.g., Shell, Barclays etc.)		N	
Secondary Developer	Text	No Drop Down	• Developer with 2nd highest percentage interest in the project • Enter N/A if none	• Developer with 2nd highest percentage interest in the project • Enter N/A if none	• Developer with 2nd highest percentage interest in the project • Enter N/A if none		N	
Technology Type	Drop Down	Biodiesel Biogas Biomass Conduit hydro Digester gas	• Fuel chemically derived from plant or animal oils that can be used in a diesel-fired engine  • Pipeline gas from the decomposition of organic material. Choose this selection when IOU is purchasing the biogas directly not electricity produced from biogas.  • Wood, Wood Waste, Other Solid Waste: Covers purpose-grown energy crops, multitudes of woody materials generated by an industrial process or provided directly by forestry and agriculture as wastes (rice husks, nut shells, etc.)  • Man-made canals or pipelines pertaining to water agencies and/or irrigation districts. If unsure as to whether a project is small hydro or conduit hydro, select small.  • Gas composed principally of methane and CO2 produced by anaerobic digestion and combusted to produce power. Anaerobic digestion (or fermentation) occurs naturally or with a man-made digester. Biodegradable materials include biomass, manure, etc.				N	• Removed "Solar PV - unidentified" as an option as it is very unlikely a utility wouldn't know if utility-scale project was going to be rooftop or ground mount.

			Geothermal	• Energy available as heat emitted from within the earth's crust, usually in the form of hot water or steam.						
			Hybrid	• Select if PPA combines two or more technology types.						
			Landfill gas	• Produced by wet organic waste decomposing under anaerobic conditions in a landfill. Select this category for contracts that are with a landfill company, otherwise select digester. This is subset of 'Digester' type.						
			Muni solid waste	• Waste produced by the residential, commercial and public services sectors and incinerated in specific installation to produce heat and/or power. The key here is that the contract is with a municipality, as distinct from 'Biomass' category.						
			Ocean/tidal	• Mechanical energy derived from tidal movement, wave motion or ocean current and exploited for electricity generation.						
			Small hydro	• Nameplate/Installed capacity <30 MWs, Electric power generated by using the gravitational energy available when water flows from a higher to a lower elevation.						
			Solar PV - Rooftop	• Generates electric power by using photovoltaic (PV) cells to convert energy from the sun into electricity. (Select if Rooftop). This includes concentrating PV.						
			Solar PV - Ground mount	• Generates electric power by using photovoltaic (PV) cells to convert energy from the sun into electricity. (Select if Ground Mount). This includes concentrating PV.						
			Solar Thermal - no storage	• Uses mirrors or lenses to concentrate sunlight to harness solar energy for thermal energy (heat) for electricity generation. (Select this if no heat storage capability for the facility)						
			Solar Thermal - with storage (molten salt)	• Method uses mirrors or lenses to concentrate sunlight to harness solar energy for thermal energy (heat) for electricity generation. (Select this if there is heat storage capability for the facility)						
			Space solar	• Solaren						
			Wind	• Kinetic energy of wind exploited for electricity generation in wind turbines.						
Solicitation / Bilateral Year	YYYY	No Drop Down		• For Solicitations, enter year of solicitation. • For Bilaterals, input year negotiations started.	• Year executed		• For Solicitations, enter year of solicitation. • For Bilaterals, input year negotiations started.	• Contract Type	N	
Expected FCC Classification	Drop Down	Grandfathered Category 1 Category 2 Category 3		• For all projects, forecast which PCC classification is expected to apply to generation (pursuant to D.11-12-052) • For projects with multiple expected PCC classifications, input the classification associated with the majority of energy			• For all projects, forecast which PCC classification is expected to apply to generation (pursuant to D.11-12-052) • For projects with multiple expected PCC classifications, input the classification associated with the majority of energy			
Contract Type	Drop Down	Solicitation Bilateral Feed in Tariff UOG UOG - Solicitation RAM 1 RAM 2 RAM 3			• Select			• Solicitation/ Bilateral Year	N	
REC or Bundled Product	Drop Down	REC Bundled		• Classification of REC/Unbundled is based on D.11-12-052. (REC-only) • Classification of REC/Unbundled is based on D.11-12-052. (REC-only)			• Classification of REC/Unbundled is based on D.11-12-052. (REC-only) • Classification of REC/Unbundled is based on D.11-12-052. (REC-only)			
Contract Length (years)	Numerical	No Drop Down		• Term in contract.	• Term in contract		• Expected term.		N	
Energy Delivery Status	Drop Down	Delivering Not Delivering Unknown - not in active negotiations		• Facility is delivering energy • Facility is not delivering any energy yet. • Do not select.	• Facility is delivering energy. • Facility is not delivering any energy yet.		• Facility is delivering energy. • Facility is not delivering any energy yet.	• General Project Information Notes if delivering	N	• Changed this column from Operational Status to better reflect that this addresses the energy delivery status of the facility and not whether it has achieved Commercial Operation under the PPA. This information can be derived from the Expected or Actual COD column as well as the columns that address the major aspects of development / Permit Status, Financing
Negotiation Status	Drop Down	Preliminary: Not Individually Presented to PRG			Leave Blank		Project is in the early stages of negotiations and has been presented to the PRG as a part of a solicitation shortlist but not individually presented to PRG.			

			Preliminary: Individually Presented to PRG			Project is in the early stages of negotiations and has been presented to the PRG individually OR was presented as an exploratory/demonstration project individually.			
			Advanced: Not Individually Presented to PRG			Project has some major issues outstanding and has been presented to the PRG as a part of a solicitation shortlist but not individually presented to PRG.			
			Advanced: Individually Presented to PRG			Project has most, if not all, major issues finalized, and has been presented to the PRG individually.			
			N/A			Project is not required to be presented to the PRG (e.g. Feed-in Tariffs)			
			Negotiations Terminated			Negotiations regarding this project have been officially terminated.			
<b>CPUC Approval Status</b>	Drop Down		No approval needed Not yet submitted for approval Pending approval Approved Approved - amendment under negotiation Approved - amendment pending approval Advice Letter Withdrawn Rejected			* Select this       * If this option is selected, NO NEED TO UPDATE ANY OTHER DATA. The project will be moved to the bottom of the report.			* New column created to split out CPUC Approval items and PPA status to better reflect the status between the counterparty and the utility, vs. the status with the CPUC as well as better match the unique data fields in the database.
<b>CPUC Approval Date</b>	Text	No Drop Down		The date on which the original RPS contract/PPA was Approved by the CPUC. If the CPUC has not yet approved the project, or the project is not online, please enter "N/A". If the project is online, and did not require CPUC approval, please enter "No Approval Necessary"	If the CPUC has not yet approved the project, or the project is not online, please enter "N/A". If the project is online, and did not require CPUC approval, please enter "No Approval Necessary"	If the CPUC has not yet approved the project, or the project is not online, please enter "N/A".			
<b>Contract Execution Date</b>	MM/DD/YYYY	No Drop Down		The date on which the original RPS contract/PPA was executed by the IOU. If contract is converting from QF to RPS, put the execution date of the RPS contract. If contract was amended and restated, put the date the amended and restated contract was executed.		The date on which the original RPS contract/PPA was executed by the IOU. If contract is converting from QF to RPS, put the execution date of the RPS contract. If contract was amended and restated, put the date the amended and restated contract was executed.			
<b>PPA Status</b>	Drop Down		Under negotiation Negotiations terminated  PPA Executed  PPA Terminated  PPA Expired	* Do not select. * Do not select.   * If this option is selected, update Reason for Termination column. NO NEED TO UPDATE ANY OTHER DATA. The project will be moved to the bottom of the report. * If this option is selected, update Reason for Termination column. NO NEED TO UPDATE ANY OTHER DATA. The project will be moved to the bottom of the report.		* Do not select. * If this option is selected, update Termination Reason column. NO NEED TO UPDATE ANY OTHER DATA. The project will be moved to the bottom of the report. * Do not select. * Do not select.		N	* Moved PPA Status column to directly after COD information. * Split out PPA status and CPUC Approval Status for reasons listed above.
<b>Reason for Termination</b>	Text	No Drop Down		* If PPA Status changes to contract terminated, enter reason here. * Otherwise, leave blank.	* Leave blank	* If PPA status changes to Negotiations terminated, explain here. * Otherwise, leave blank.	<b>PPA Status</b>	Y	* New column clearly capture the reason for termination. This is also a discrete field in the database. It was also determined that the other changes in PPA status are self-explanatory
<b>Contract Capacity (MW)</b>	Numerical	No Drop Down		* Enter nameplate capacity if the contract receives energy from the full facility. * Enter 0 if the contract only indicates the volume of energy to be received without any facilities listed (ex. Powerex) * Enter the value that is the nameplate capacity times % of output if contract receives energy from a portion of a single facility (ex: Klondike, Shells) * Enter value that is the nameplate capacity times % of output for each facility if the contract receives only the volume of energy from many facilities listed in the contract (ex. PacifiCorp) * Enter 0 if the contract receives only RECS * Enter 0 if the project is injection biogas	* Enter the nameplate capacity in the contract, regardless of whether the contract is Full Buy/Sell or Excess Sale.	* Enter nameplate capacity if the contract receives energy from the full facility. * Enter 0 if the contract receives only the volume of energy without any facilities listed (ex. Powerex) * Enter value that is the nameplate capacity times % of output if contract receives energy from a portion of a single facility (ex: Klondike, Shells) * Enter value that is the nameplate capacity times % of output for each facility if the contract receives only the volume of energy from many facilities listed in the contract (ex. PacifiCorp) * Enter 0 if the contract receives only RECS * Enter 0 if the project is injection biogas?			* Edited to further clarify definition. This will better reflect the differences in the contract capacity under different scenarios. This will not necessarily match the advice letter values.

Min Capacity (MW)	Numerical	No Drop Down	<ul style="list-style-type: none"> <li>If no optionality, this should be the same value as <b>Contract Capacity</b>.</li> <li>If there is optionality to build a <b>smaller</b> capacity project, enter the value here and explain in <b>General Project Information Notes</b>.</li> </ul>	This should be the same value as <b>Contract Capacity</b> .	<ul style="list-style-type: none"> <li>If no optionality, this should be the same value as <b>Contract Capacity</b>.</li> <li>If there is optionality to build a <b>smaller</b> capacity project, enter the value here and explain in <b>General Project Information Notes</b>.</li> </ul>	<ul style="list-style-type: none"> <li><b>General Project Information Notes</b> - if optionality in capacity.</li> </ul>	N	<ul style="list-style-type: none"> <li>Edited to further clarify definition.</li> <li>This column will always be the same as <b>Contract Capacity</b> for FIT contracts as they have no optionality.</li> </ul>
Max Capacity (MW)	Numerical	No Drop Down	<ul style="list-style-type: none"> <li>If no optionality, this should be the same value as <b>Contract Capacity</b>.</li> <li>If there is optionality to build a <b>larger</b> capacity project, enter the value here and explain in <b>General Project Information Notes</b>.</li> </ul>	This should be the same value as <b>Contract Capacity</b> .	<ul style="list-style-type: none"> <li>If no optionality, this should be the same value as <b>Contract Capacity</b>.</li> <li>If there is optionality to build a <b>larger</b> capacity project, enter the value here and explain in <b>General Project Information Notes</b>.</li> </ul>	<ul style="list-style-type: none"> <li><b>General Project Information Notes</b> - if optionality in capacity.</li> </ul>	N	<ul style="list-style-type: none"> <li>Edited to further clarify definition.</li> <li>This column will always be the same as <b>Contract Capacity</b> for FIT contracts as they have no optionality.</li> </ul>
Expected Energy (GWh)	Numerical	No Drop Down	<ul style="list-style-type: none"> <li>Enter value based on expected annual energy using <b>Contract Capacity</b> as the basis.</li> <li>If project is contractually phased, include GWh/yr for each phase. Project leads will have created multiple rows for phased projects.</li> </ul>	Value should match the publicly posted Expected GWh/yr on FIT webpage.	<ul style="list-style-type: none"> <li>Enter value based on expected annual energy using <b>Contract Capacity</b> as the basis.</li> <li>If project is contractually phased, include GWh/yr for each phase. **General PDSR Instructions:**

General - Negotiations Terminated	Data for terminated contracts and negotiations have not been updated. These project have been moved to the bottom of the report.
General - UOG	PDSR contains utility-owned projects that would be purchased turn-key, but not UOG PV projects, since the development status of those is being addressed as part of the PV Program Compliance Report, which the utility also filed with the Commission.
General - No Removal of Projects	<ul style="list-style-type: none"> <li>• Going forward, must also include [all] operational, terminated, and expired contracts. The utility can no longer take any contracts off the PDSR except for projects in which negotiations have been terminated and developer has been formally notified and, if applicable, deposit has been returned.</li> <li>• Removal of Projects: The only projects that can be removed are those where the contract was NOT executed and negotiations are terminated (deposit returned). The project must remain on the list with "negotiation terminated" once before removal.</li> <li>• Note included with final PDSR: "For projects in which negotiations have terminated or are inactive, the utility has reported what it has for those projects, but it is unable to gather additional and/or updated information."</li> </ul>
General - Online Projects	Data for Online projects have not been updated. These projects have been moved to the bottom of the report.

## Criteria: Scoring Guidelines

- Scale -

Version 2.0

## Score Card

Utility IE

## Company / Development Team

Project Development Experience	Score		Description
	Utility	IE	
	0	0	<b>10</b> The company and/or the development team has completed 2 or more projects of similar technology and similar or larger capacity.
			<b>7</b> The company and/or the development team has either (i) completed one project of similar technology and similar or larger capacity; (ii) begun construction of and completed financing for at least one project of similar technology and similar or larger capacity; or (iii) completed 2 or more projects of any technology and of similar capacity.
			<b>4</b> The company and/or the development team has completed 2 or more projects of any technology but less capacity per project (wholesale generation).
			<b>2</b> The company and/or the development team has either (i) completed at least one project of any technology and capacity (wholesale generation); or (ii) begun construction of and completed financing for at least one other similar project.
			<b>0</b> None of the above.

N/A

key concepts: development team, completed project, quantity of projects, similar technology or capacity

- 'Project development' refers to developer activities that are conducted on projects before their COD. This criterion is asking about the developer's prior experience developing other projects.
- We assume wholesale generation for prior experience to count. 'Project' refers to utility-scale, wholesale generation projects. i.e. behind the meter, distributed generation does not count.
- The term 'completed' is assumed to mean bringing a project through the development and construction phases to COD.
- When considering 'similar technology', thin-film and crystalline PV can be considered similar, as can non-concentrating fixed-tilt, single-axis, and dual-axis tracking PV. Concentrating PV should not be considered similar to non-concentrating PV.
- Can include experience gained by principals while previously at other entities.

Ownership / O&M Experience	Score		Description
	Utility	IE	
	0	0	<b>10</b> The company, development team or subcontractor has experience with 2 or more projects of similar technology and capacity. (e.g., 20 MW photovoltaic facility (thin-film))

<b>7</b>	The company, development team or subcontractor has experience with at least 1 project with similar technology.
<b>4</b>	The company, development team or subcontractor has experience with 2 or more projects of any technology (wholesale generation).
<b>2</b>	The company, development team or subcontractor has experience with at least 1 project of any technology and capacity (wholesale generation).
<b>0</b>	None of the above.
<b>N/A</b>	

key concepts: development team, O&M experience, quantity of projects, similar technology or capacity

- We assume this criterion focuses primarily on the operations and maintenance (O&M) experience of the entity performing the O&M for the project being scored. O&M refers to activities on projects after their COD. This criterion is asking about the entity’s prior experience operating and maintaining other projects.
- For evaluating this criterion, consider the O&M plan for the project being scored, identify who the entity is that is going to be operating the plant after COD, and evaluate that entity’s prior O&M experience.
- We assume wholesale generation for prior experience to count. Experience for this criterion refers to owning, operating, and maintaining utility-scale, wholesale generation projects.
- When considering ‘similar technology’, thin-film and crystalline PV can be considered similar, as can *non-concentrating* fixed-tilt, single-axis, and dual-axis tracking PV. Concentrating PV should not be considered similar to non-concentrating PV.
- Can include experience gained by principals while previously at other entities.

**Technology**

<b>Technical Feasibility</b>	0	0	<b>10</b> Project will use commercialized technology or commercialized technology that is nearly identical (e.g., a wind turbine with modest upgrades from the last model) to technology that is currently in use at a minimum of 2 operating facilities of similar or larger capacity (worldwide).
			<b>5</b> Project will use commercialized technology that is currently in use at a minimum of 2 operating facilities, but at first-of-its-kind scale. For example, existing projects do not exceed 20 MW and the proposed project is for greater than 100 MW.

2	Either (i) the project will use key components of commercialized technology, but in an application that has not yet been commercially proven; or (ii) project feasibility is supported by third party, independent engineer's report that verifies the cost and performance. (Technology is not commercially proven)
0	None of the above.

N/A

key concepts: commercialized technology, quantity of deployments, scale, non-commercial technology

•We consider 'commercialized technology' to be a technology that has been financed and is being used in at least one commercial (not demonstration) utility-scale project anywhere in the world.

<b>Resource Quality</b>	0	0	<p><b>10</b> Bidder demonstrated that the resource can support the production profile. For example:</p> <ul style="list-style-type: none"> <li>'- Geothermal: Based on results of test wells or verified third party resource assessment.</li> <li>'- Wind: Based on credible meteorological data or verified third party resource assessment.</li> <li>- Solar: Based on credible solar radiation meteorological data or verified third party solar radiation resource assessment.</li> <li>'- Biomass: Sufficient quantities of fuel stock under control or contract for a minimum of five years.</li> </ul>
			<p><b>7</b> Biomass project demonstrated sufficient quantities of fuel stock under control or contract for a minimum of two years.</p>
			<p><b>5</b> The resource appears sufficient to support the project's production profile. Assumptions are reasonable, for example, based on comparable facilities in the same resource area, but not demonstrated by bidder, data, and/or resource assessment as described above.</p>
			<p><b>0</b> None of the above.</p>
			<p>N/A</p>

key concepts: resource, third-party resource assessment, data, fuel stock under control

•For solar, NREL data qualifies as verified 3rd party resource assessment.

•For biomass, ‘under control or contract’ means either a signed contract for fuel supply or demonstrated control over the fuel supply if not purchased from a 3rd party. For a score of ‘5’, the project has to show reasonable assumptions about the fuel supply.

<b>Manufacturing Supply Chain</b>	0	0	<b>10</b>	There are no known or anticipated supply chain constraints.
			<b>5</b>	Project scored within the top two tiers in the Technical Feasibility category, but project development is dependent on new manufacturing capacity.
			<b>0</b>	Project will rely on proprietary technical design for its key component(s), not currently in use commercially, and project development is dependent on new manufacturing capacity.
			<b>N/A</b>	

key concepts: top two tiers in Technical Feasibility, new manufacturing capacity

•ignore the word ‘development’ in the reading of the scoring guidelines.

**Development Milestones**

<b>Site Control</b>	0	0	<b>10</b>	Project has 100% site control for the project site and gen-tie line corridor connecting the facility to the grid. Site control is achieved through either (i) direct ownership, (ii) a lease, or (iii) an option to lease or purchase; including the equivalent process for securing site control on public
			<b>6</b>	Project has a majority control (≥ 50% and <100%) over the project site and gen-tie line corridor connecting the facility to the grid.
			<b>2</b>	Project has a minority control (< 50%) over the project site and gen-tie line corridor connecting the facility to the grid.
			<b>0</b>	None of the above.
<b>N/A</b>				

key concepts: site control, project site and gen-tie, ownership / lease / option, percentage under control

•Percentages listed are assumed to refer to the percentage of the project site area and gen-tie line corridor for which the developer has achieved site control.

•Assume 75% / 25% split for project site area and gen-tie line corridor weighting. That is:

$$\text{Control} = [0.75 * \text{percentage of project site area under control}] + [0.25 * \text{percentage of gen-tie line corridor under control}]$$

As an example, if the developer has 80% of the project site area under control and 30% of the gen-tie corridor under control,

$$\begin{aligned} \text{Control} &= [0.75 * 0.80] + [0.25 * 0.30] \\ &= 0.675 \\ &= 67.5\% \end{aligned}$$

Permitting Status	0		10
			5 Project has applied for its CUP or AFC, or other definitive permit based on the project's jurisdiction, as applicable. The applicable permit or application has been deemed data adequate and/or the designated agency has initiated its review. No fatal flaws have been identified (e.g., protected species and/or land, high land mitigation requirement) that will prevent project
			2 Bidder has not initiated permitting. No fatal flaws have been identified (e.g., protected species and/or land, high land mitigation requirement) that will prevent project development.
			0 None of the above.
			N/A

key concepts: permit based on project's jurisdiction, status - received, applied, not initiated

•For a score of 10, assume 'received' means final and non-appealable approval

**Project Financing Status**

0	0
---	---

- 10** The bidder demonstrated that project financing has been secured either through "balance sheet" financing or power purchase agreement (PPA) financing.
  - 5** The bidder has obtained financing for at least 1 project of similar technology and similar or larger capacity.
  - 2** The bidder has obtained financing for at least 1 project of any technology and capacity (wholesale generation).
  - 0** None of the above.
- N/A**

key concepts: bidder, financing secured, similar technology and capacity

- The score of '10' refers to financing of the project being scored, and specifically if financing for this project has been secured.
- The scores of '2' and '5' can be assigned based on the Bidder's (current development team's) previous experience in financing other projects. So, these scores are not actually 'status' scores for financing this project, rather they are 'experience' scores given if the Bidder has successfully financed earlier projects. Unlike the previous criteria of Project Development Experience and Ownership Experience, do not consider experience gained by principals while previously at other entities.

		Power Projects	Biogas Projects Only	
<b>Interconnection Progress</b>	0	0	<b>10</b> The project has executed its Interconnection Agreement.	Pipeline interconnection agreement is signed, has secured delivery path and injection point
			<b>9</b> The project has completed its Phase II studies of the Generator Interconnection Process (GIP), or has completed its Facilities Study, or has passed the Fast Track screens. If the project will interconnect outside the CAISO's or the investor-owned utility's jurisdiction, it has achieved the equivalent interconnection progress.	Pipeline interconnection studies have been completed; in negotiations to secure delivery path and injection point
			<b>6</b> The project is in Phase II of the GIP, has posted necessary deposits, and is in compliance with all CAISO or utility requirements for maintaining queue position, or the project has initiated its Facilities Study. If the project will interconnect outside the CAISO's or the investor-owned utility's jurisdiction, it has achieved the equivalent interconnection progress.	Has initiated pipeline interconnection studies
			<b>3</b> The project is in Phase I of the GIP, or has initiated the System Impact Study, or has submitted its Interconnection Request to the CAISO or utility, and has posted necessary deposits and is in compliance with all CAISO or utility requirements for maintaining queue position. If the project will interconnect outside the CAISO's or the investor-owned utility's jurisdiction, it has achieved	Has identified delivery path and injection point
			<b>0</b> None of the above.	None of the above
		<b>N/A</b>		

key concepts: interconnection agreement, in Phase I, in Phase II, completed Phase II, equivalence

<b>Transmission System Upgrade Requirements</b>	0	0	<b>10</b> No transmission system upgrades are required for the project pursuant to the most recent interconnection study, or the project has passed the Fast Track screens.
			<b>9</b> Transmission system upgrades required for the project pursuant to the most recent interconnection study have received any and all required CAISO and CPUC approvals.
			<b>8</b> Transmission system upgrades required for the project pursuant to the most recent interconnection study require a Permit to Construct or an approved Notice of Construction from the CPUC, for which an application or advice letter, as applicable, has been filed.

Administrative requirements for transmission system upgrades (See General Order 131-D for complete legal requirements)

A Certificate of Public Convenience and Necessity (CPCN) is required for a

new transmission line or upgrade – greater than 200 kV. A CPCN requires CEQA review and a determination of need.

A Permit to Construct (PTC) is required for a new transmission line or upgrade – 50 kV to 200 kV, or a substation upgrade only. A PTC requires CEQA review.

Some exemptions to the above that would allow only a Notice of Construction to be sufficient:

- The replacement of existing power line facilities or supporting structures with equivalent facilities or structures.
- The placing of new or additional conductors, insulators, or their accessories on supporting structures already built.
- Power lines or substations to be relocated or constructed which have undergone environmental review pursuant to CEQA as part of a larger project, and for which the final CEQA document finds no significant unavoidable environmental impacts caused by the proposed line or substation.

<b>5</b>	Transmission system upgrades required for the project pursuant to the most recent interconnection study require a Permit to Construct or an approved Notice of Construction from the CPUC, for which an application or advice letter, as applicable, has not been filed.
<b>4</b>	Transmission system upgrades required for the project pursuant to the most recent interconnection study require a Certificate of Public Convenience and Necessity from the CPUC, for which an application has been filed.
<b>1</b>	Transmission system upgrades required for the project pursuant to the most recent interconnection study require a Certificate of Public Convenience and Necessity from the CPUC, for which an application has not been filed.
<b>0</b>	None of the above.
<b>N/A</b>	

key concepts: interconnection study, transmission system upgrades, Permit to Construct, Certificate of Public Convenience and Necessity, Notice of Construction, application, approvals

•Scoring for this criterion requires information from an interconnection study or documentation of passing the Fast Track screens (only for projects <5MW). This criterion deals only with transmission system upgrades.

•If no interconnection study information or Fast Track documentation is provided, the score is 0.

•If the interconnection study (IS) states that no transmission system upgrades are required, the score is 10.

•If transmission system upgrades are necessary, the IS will describe them, but typically will not specify whether a Permit to Construct (PTC), Certificate of Public Convenience and Necessity (CPCN), or Notice of Construction (NOC) is required. Comparing the description of the upgrades provided in the IS with the administrative requirements shown in the box above, the scorer should select the PTC, CPCN, or NOC as applicable for the project.

•The counterparty will likely need to ask the CAISO and the PTO for documentation supporting whether the appropriate applications have been filed and approved.

•In the absence of reliable information, score this criterion conservatively.

<b>Reasonableness of COD</b>  Utility should validate the reasonableness of project's commercial online date (COD) based	0	0	<b>10</b>	Utility reasonably expects the project will achieve its COD.
			<b>5</b>	Utility reasonably expects project's COD to occur within 12 months of the proposed COD.

on the scores given for criteria above.

---

<b>3</b>	Utility reasonably expects project's COD to occur within 12 - 24 months of the proposed COD.
<b>0</b>	Utility reasonably expects project's COD to occur more than 24 months after the proposed online date.
<b>N/A</b>	

---

key concepts: COD within x months

•'COD' refers to the online date in the contract, without any permitted delays.

•Consider project information about transmission, permitting, financing, etc. and confirm if the COD proposed is reasonable. Specifically consider any significant limitations, hurdles, etc. that the project has to face. Provide notes on any items expected to delay the online date past the proposed COD.

- end -
