Subject: RE: SCP-PG&E 2014 Joint Rate Comparison

Karen,

I wanted to thank you as well, and let you know that we are pleased a resolution has been reached to use last year's GHG methodology for the 2014 Joint Rate Comparison. I also just wanted to clarify that last year's GHG methodology did draw heavily from the Climate Registry process (which is slightly different than the 'protocol' referenced below), and is publically reviewed and adopted by our Board of Directors. As discussed, the same methodology will be applied in this year's comparison document.

We look forward to the next steps as outlined clearly by Karen below.

Best Regards,

Dawn

Dawn Weisz

Subject: SCP-PG&E 2014 Joint Rate Comparison

Hi Karen,

Thank you for your assistance yesterday.

As also indicated by MCE, we have reached consensus with PG&E to proceed with reporting GHG on the 2014 Joint Rate Comparison using The Climate Registry protocol. Very shortly, the final, consensus version of the SCP-PG&E Joint Rate Comparison mailer will be submitted for your approval.

We continue to disagree, however, that CCAs can be compelled by the PAO or an individual Commissioner office to include information in future Joint Rate Comparisons not otherwise required by D.12-12-036. Accordingly, per your instruction, by April 30, COB, SCP will submit a summary description of our position on this matter, and will email it to you as well as the others on this email. Because everything else regarding the 2014 Joint Rate Comparison has been resolved, we believe the inquiry to President Peevey's office is limited to ascertaining the extent of the PAO's authority to compel inclusion of additional information not enumerated in D.12-12-036.

Best,
