We are deferring it - but we do have a statutory cap that we can turn to if any one (such as Hill) complains!

One thought. Why say anything at all ? Why not just defer it ?

We are going to say that for 7/1 and then work on the cap later

Infinite.

As for the statute, SB 291 provides: "The Commission shall, in an existing or new proceeding, develop and implement a safety enforcement program applicable to gas corporations and electric corporations..." including an "administrative limit on the amount of monetary penalty that may be set by Commission staff". I don't believe you can say the policies and procedures that have been in place forever meet that requirement.

A cap is not required by SB291 - and if you don't want \$20m it stays "infinite" for now till we have some stakeholder input and refine our "policy". And - we don't want to do anything that even hints that we have not met the statute's requirements - we have - and that is the story. So - there are only 2 choices: the \$20m cap or infinite

Carol - I hear that you guys will be taking out the \$20 million cap in the OIR PD. However, I've also heard that the cap is now "infinite" or \$50K per day. I'm not sure that this will pass muster under the statute of SB 291. Couldn't you put language in the OIR to recommend a set of comments on what the administrative cap should be, do it on an expedited schedule, and approve the cap before the 7/1 statutory date ?
