Subject: RE: Substation Security

Ray,

Thanks for sending. Looks good. Would you please call me when you get a chance to discuss the Q&A on Metcalf? Our team will have concerns with that part of the agenda given the confidentiality issues and would be helpful to get your thoughts on the screening.

Meredith

Subject: Substation Security

All:

Attached is the proposed agenda for the substation security event. I have incorporated the comments from PG&E and SCE, as well as from Liza. The major changes are:

- Removal of Cyber Security
- Adding a Q&A on Metcalf
- Changing the second day meetings to High Level Overview, to easy concerns of confidentiality between utilities.
- Removal of SB699
- Changed Public Available Data to Data and Concerns, to also discuss data given to CPUC, and public records request.

Also, only the first day will appear on the Commission's daily calendar, not the second day.
Please let Ben and I know of any concerns you have with the schedule.

Ray
