Subject: RE: Drought Resolution

Ed,

Do you need any additional information? Is the resolution on track for 6/12? I know you are leaving soon and wanted to check in before you go. I hope you have a great trip!

Meredith

The PPT you sent is helpful but it is a 60 page document that repeats the same 6 pages 10 times. Can you help me out and send me one that is just 6 pages.

Subject: Drought Resolution

Ed,

PG&E is already conducting all required vegetation management compliance work. In addition, in response to the drought, PG&E would like to conduct

incremental work that would mitigate the risk of fires associated with our facilities and reduce the impact of any fires on our facilities, including partnering with other stakeholders, such as Cal Fire. Attached is a presentation that we provided to SED and Energy Division that describes the incremental work and a letter from the Board of Forestry.

Also, in response to your question, PG&E did not submit a formal request that the CPUC issue a resolution but have had numerous discussions and email exchanges with SED and Energy Division requesting a resolution.

Hope this information helps. Please let me know if you would like to discuss.

Have a great weekend!

Thanks,

Meredith
