Gentlemen,

Please add" boiler brick and/or block insulation" to the items needing confirmation that they are asbestos free, and the name of the Boiler Manufacturer, and the year it was built, ie....CE, Foster Wheeler , B&W, etc....

Thank You,

Ron Lok

CPUC

Subject: RE: Kern Demolition Restart Kick Off Meeting

Per the kick-off meeting on April 30, 2014 at PG&E's Kern Boiler site it was agreed that these items should also be included as evidence if discovered during the demolition:

1. Geotech Fabric (used for wrapping charged structural columns)
2. Chain Link (used for wrapping charged structural columns)
3. Boiler Castable Refractory from furnace water walls (remove a sample from the furnace waterwall)

It was mentioned in this meeting that all asbestos mitigation work has been completed, however, please submit test documentation and/or asbestos mitigation reports that confirm that the castable refractory used in the PG&E Kern Boilers water-wall section of the furnace are free of asbestos. Please submit this no later than May 7, 2014.

Thank You,

Ron Lok

CPUC

Ron,

I don't plan to attend the kick off meeting. You have met PG&E's project manager, Anthony Haroian, and he will be your primary point of contact. Let us know if you need any information in advance of the meeting.

Thanks,

Erik

Hi Anthony,

Sorry for the late reply, I was in training all last week. Ron Lok (whom you've met) from our office will attend the kick-off on Apr 30. Hopefully, he's contacted you already.

Thanks,

Rick

Valerie, Rick and Ronald,

You are invited to participate in the 4/30 kick off meeting in Bakersfield to restart demolition of the Kern Power Plant. Please let me know if you have any questions and if you plan to participate so we can get an accurate head count.

Thanks,

Erik
