Subject: Drought Update

Officers and Directors:

We launched a cross-functional Drought Task Force in March to address the impacts of California's extreme drought on our operations and customers . The task force has worked to coordinate and communicate efforts with our various stakeholders – as “One PG&E.” I am pleased to share with you the first of what will be regular updates on our drought management efforts.

The intent is to arm you with information to share with your stakeholders inside and outside the company. It's one of several ways we're communicating our drought actions, including PG&E@Work and Currents stories, and our [Drought 2014](#) intranet site.

Please take a look at the attached newsletter and [let us know](#) if it hits the mark, or if you have suggestions for making it more useful.

Janet
