Subject: RE: Electric Emergency Response/Management Plan

Raymond,

Here is the response to your second question. We have not experienced a measured event in recent years. The last event was in January 2008 and the excerpt from PG&E's GO 166 filing in the standard 12 section is below. We also filed a CEMA application for qualifying costs for this event.

Thanks,

Meredith

GO 166 Report: Standard 12 Section

On January 3, 2008 at 3pm, PG&E initiated its response to a Level 2 – Area Wide Emergency in accordance with the E&O EEOP. On January 4, 2008 at 7:00am, PG&E initiated its response to a Level 3 – Multi-Area Emergency in accordance with the E&O EEOP.

Subject: Electric Emergency Response/Management Plan

Meredith,

I would like to request a digital copy of PG&E's Electric Emergency Response/Management Plan that parallels the gas response plan. If possible, I would like to review it quickly before my meeting with Cal OES on Tuesday, 6/10 at 1pm. I know this is last minute but is there any way that you could place the file on an FTP site for me to download by either Monday night or Tuesday morning?

Also, pursuant to GO 166 Standard 12, has PG&E provided performance benchmarking for major outages and/or measured events? If so, please provide that to me as well. Call me if you have any questions.

Thanks,

Raymond Cho
