Subject:	CPUC Staff Issues Hazard Analysis and Mitigation Report on Aldyl A Polyethylene Gas Pipelines: CPUC Information Alert
CPUC Information Alert: CPUC Staff Issues Hazard Analysis and Mitigation Report on Aldyl A Polyethylene Gas Pipelines	
Safety & E	rnia Public Utilities Commission's (CPUC) Risk Assessment and Enforcement Section of the nforcement Division today issued a Hazard Analysis & Mitigation Report on Aldyl A ne Gas Pipelines in California.
Pipelines of low ductile potential ty	is the first in a series of Hazard Analysis and Mitigation Reports. Aldyl A Polyethylene Gas of a certain vintage are more prone to failure due to slow crack growth, particularly those with inner wall characteristics. The paper outlines the history of Aldyl A pipe, describes the types of failure associated with early vintage Aldyl A pipe, assesses the current gas operators of Aldyl A pipelines in service, and makes recommendations for future risk management.
occurring.	alysis and Mitigation Reports serve as a forward-looking tool to help prevent incidents from The reports are premised on the theory that an inadequate risk assessment and ent response may well be more dangerous than an adequate response to an inherently more situation.
	is available at: .cpuc.ca.gov/NR/rdonlyres/5A3DBD9A-1786-4B80-AA34-D13108B063B6/0/AldylA.pdf.
Please let	me know if you have any questions.
