Subject: RE: CPUC Physical Security Workshop Conference Call

Based on my responses the best time for this call is 9 AM Monday. Sorry if some of you can't make the call, we'll fill you in on Wednesday morning. I don't think it will be too big a problem.

PG&E has agreed to host the call on their system –

Dial-in #:

Meeting #:  (please also dial asterisks )

Also, for day two we are going to be shortening the presentations by the three major utilities to 15 minutes to reduce redundancy. Then we will replace the time with roundtable discussions. We won't be projecting anything, but if you have slides or other material in hardcopy that should be okay.

Thanks.

Ben

**Subject:** CPUC Physical Security Workshop

Hello Panel:

1. This will be webcast. This is a recent change.
2. Major Parsons from the National Guard will not be able to attend. His representative did send answers to some of the questions in written form (attached).
3. I will likely be moderating the panel with assistance from Clyde Miller of SCE.
4. Rather than reading bios, we will ask each panelist to give a brief bio and description of their duties and list one or two main priorities for electric system security.
5. In preparation for the discussion panel, we are attempting to set up a conference call or to meet an hour before the scheduled start time (around 9 AM). I understand this may not be possible. Probably the only day to feasibly do a call is Monday. If you have availability Monday let me know, otherwise we can attempt to meet before the event for a brief time (again, if possible).
6. I am attaching some possible questions. Some of these came from SCE, some were posed by a member of the state legislature's staff, and some are mine. Please let me know if you suggest any others, any changes to or concerns about these questions, or if you have any other questions you think would be appropriate.

Please call me if you would like to discuss anything.

Ben Brinkman, P.E.
