Erik,

Yes, please have Redac resend the report because it expired on the FTP site. Also, a draft copy of the work plan would be appreciated.

Thanks,

Ron Lok

Ron,

Welcome back. The asbestos report was too big to send by email, so we uploaded to the FTP site. You can download it there. You should have received an email from Redacted on June 10th notifying you that the report was available for download. I presume he sent you a link and/or instructions. Do you have that email or should I ask Redac ted to resend it?

In terms of next steps ---- we are very close to having a final asbestos abatement workplan (any day now). Once it is final, we will notify the San Joaquin Valley Air Pollution Control District of our intent to resume demolition. We expect to restart demolishing the boilers shortly after this notification. Would you like me to send you the final draft of the asbestos abatement workplan?

Erik

Erik,

I would like to apologize for not returning your voice and emails during the past month as I had an unexpected absence from work during that time.

Could you resend the subject asbestos report ? Also, what's the current progress on cleaning-up and demolishing the boilers….what's the work plan for containing asbestos?

Thanks,

Ron Lok
