Subject: RE: EDF Leak Tracking Website

Brian - Thank you for the information. Please set something up for me - I want to talk through the details.

Laura - if possible, I'd like PG&E on the same call.

> We have been working with EDF and we will have similar maps released in the future. That being said, we have a lot of issues with what they're doing. Here are a few concerns. Do you wanna chat about this?

>

> 1. Methane leakage maps will cause customer confusion and unnecessary panic – their site seems to rank the emissions in terms of “low, medium and high” levels of leakage

> 2. Although EDF focus is on methane leakage and climate change, customers may not differentiate and associate with safety concerns

> 3. Although those on the call agreed that safety is the first priority, and acknowledged the utilities already handle any potentially hazardous leaks -- the mapping information may actually divert utility resources away from true safety issues to address customer concerns about non-hazardous methane leaks

> 4. “120 times more potent than Carbon Dioxide” claim is not the standard being used and causes more inconsistency and confusion

>> I just heard (here at NARUC) that this is controversial. Apparently they used Picarro. Criticism is that it was done in an uncontrolled way that is misleading, greatly overstating gas leaks. As you know picarro picks up anything and it needs to be analyzed. I guess edf will do some press thing tmrw. Don't know more yet.
