Subject: meeting request with Mel Christopher concerning gas distribution control center

Laura:

I'm requesting a field visit of the **gas distribution control center** with an eye towards current and planned staffing level, construction progress, funding levels, etc. This request is in relation to the PD on the GRC. I'm on a fact finding mission in support of the ALJ in the GRC. I will need to finish gathering all the facts by Friday and provide answers to the ALJ in the afternoon. I need to meet with someone who can answer these types of questions. The emphasis will be on what has been requested by PG&E vs. current and planned levels. I want to see proof of justifications and explanations for any deviations in the areas I mentioned. If you have any questions, please call my cell phone at 510-282-8780.
