Subject: Re: PG&E's Emergency Preparedness & Response

Hi and thanks--
We will coordinate and get back it you soon.

Meredith and Laura,

There are several people at the Commission who are interested in attending different emergency response exercises that utilities perform. I know of a few of them, but it would be great to get one single list for both gas & electric through the end of the year.

Thanks in advance!

Liza

Subject: PG&E's Emergency Preparedness & Response

Charlotte and Ken,

We would like to meet with you and your teams to discuss PG&E's Emergency Management Advancement Program. A description of the program is below. Would you please let me know whether you would be interested in meeting to discuss and if so, whether July 31 at 1:30 or August 7 at 9:30 would work? If not, I can send other potential dates.

Thanks,

Meredith

In 2013, PG&E implemented an initiative to strengthen its capabilities across the Company to respond to catastrophic events. PG&E created a company-wide emergency preparedness and response department. PG&E also adopted the Emergency Management Advancement Program to bring its response processes to industry leading standards over a 2 year time period.

PG&E's approach to a catastrophic event is predicated on our ability to scale and our ability to do so quickly. The purpose of the briefing would be to discuss the improvements in these 2 key areas that PG&E is making through EMAP, such as new damage forecasting capabilities, scaling restoration requirements, leadership support and logistics, and collapsing lead times for emergency response, restoring community priorities and communicating internally and externally. PG&E is also testing and exercising EMAPs principles and concepts through more frequent and enhanced drills.

PG&E is committed to protecting our customers' privacy.
