Subject: Electric Ops Summary

Charlotte,

Attached is the handout that I mentioned at the quarterly meeting, which includes information on the drought vegetation management activities and additional information on some of the metrics and the National Near Hit Program that we discussed. Also, below is a definition of a network failure.

I've also included the link to a WSJ article discussing PG&E's partnership with CalFIRE on the 'One Less Spark, One Less Wildfire' public safety campaign.

Thanks,  
Meredith

Network Failure: A failure of an asset (switch, transformer, etc.) or cable in the underground network systems serving downtown SF and Oakland.
