Subject: RE-SERVICE: R.12-06-013 Rate Design: SDG&E Supplementary Testimony

To All Interested Parties:

SDG&E submitted its supplemental response per ALJ McKinney's ruling on 7/11 seeking additional supplemental testimony. The response was submitted on July 23rd. In that response SDG&E provided a more thorough showing of peak period load reductions using SDG&E's bill impact calculator (in Excel). The response entailed providing an elasticity assumption and justification for the choice of the elasticity assumption. SDG&E provided 2 additional scenarios in addition to its preferred scenario of using a -.1 elasticity assumption. SDG&E explained that the -.1 Residential elasticity estimates are based on residential sales models developed to submit residential sales forecasts to the California Energy Commission's Integrated Energy Policy Report (IEPR) process. The 2 additional scenarios show a -.2 elasticity as PG&E used, and a scenario that assumes the NEM cap is reached in 2017 and what effect the elasticity assumption and reduction in residential sales by tier has on overall usage levels. SDG&E is re-serving this testimony as the Excel Spreadsheet was missing the appropriate headers and page numbers. The two tabs not printed are supporting documentation to the tabs that are.

Supplementary Testimony Updated Attachment
