Subject: RE: Tree Trimming/Emergency Meetings

Hi Terrie,

I'm really sorry for the delayed response.

Our VM manager reached out to the designated representative of the group after the work was complete to check on whether they had any concerns. She responded that they appreciated PG&E removing an acacia tree they wanted removed and asked that we continue to work together.

Our VM manager also spoke with Oakland's City Park Supervisor Giacomo Damonte while the trees were being pruning. He happened to be at the park meeting with some park volunteers for other reasons. Our manager provided him with an overview of our program and explained the work we were performing. He did not express any concerns and was supportive.

We have pictures.

Please let me know if you need additional information.

Thanks,
Meredith

When they climbed the tree, they found several branches straining the guy bob past the insulator, which required removal to ensure further damage and excessive strain on the guy wire would be avoided. A member of our PS&R team went to the site and determined that the work had to be performed in order to uphold the safety and reliability of the power lines. In order to follow ISA (International Society of Arboriculture) pruning standards we had to remove the limbs back to laterals approximately 1/3 the diameter of the limbs that were removed. Our VM manager was unable to contact Josh after the work was completed at the end of the day.

- > Also, I'm out of the office today and will not be able to attend the meeting on our emergency preparedness and response program. Brian will be there with Geisha, Barry and Mike. We also have a meeting with Stephanie Green at the end of August focused on the community outreach component of the program. Please let me know if you would like to attend and I will send the information.
