Subject: Gas Pipeline Work on Redacted				
Dear Redacte				
Since you have not provided an environmental review for work on the Redacted				
Redacted between Monday when I requested it and now, I presume that PG&E did				
not performed one in preparation for the work. This leads me to believe that there				
has been no study to balance the preservation of the sensitive habitat on this parcel				
with other aspects of the design and no effort to minimize the damage if it is				
necessary to use the parcel. All activity on the parcel should stop immediately and				
not resume until a thorough study and appropriate design modifications have taken				
place.				
Drew Shell who is active in preservation of the Edgewood Park serpentine habitat says				
that Rare plants he knows of in the area include:				
- Bitterroot (locally rare, on state parcel in area of proposed alignment)				
- Fragrant fritillary (CNPS rank 1B, on state parcel near area of proposed alignment)				
- Fountain thistle (endangered, on PG&E easement and adjacent properties)				
- Woolly-headed lessingia (CNPS rank 3, on PG&E easement and adjacent properties)				
- Serpentine leptosiphon (CNPS rank 4, on state parcel and PG&E easement)				
The Edgewood Park group has been working with Redacted at PG&E to design an				
alignment which would avoid the serpentine areas in the park. I understand that this				
process has resulted in a proposal to route the pipeline from Redacted				
Redacted				
Redacted It occurs to me that if				
the new pipeline is to be located in Redacted anyway, that it could continue south				
from the Redacted to Redacted to Redacted				
Redacted This route would be straighter, shorter, entirely avoi				
the Redacted areas with scores of houses near the				
existing pipeline route and could also avoid the Redacted				
I understand that there might be resistance by Cal Trans to use of their right of way,				
but the overwhelming advantage of this route should allow makes it imperative that				
great effort should be made to explore the possibility.				
I look forward to your prompt response,				
Thank you for your efforts,				
Steve
