David Lee is the assigned engineer and he is handling this case. He can be reached at 415 703—1137. I have asked him to call you back.

Arthur O'Donnell can be reached as a back-up, and his phone number is 415-703-1184. Mary Jo Borak is out of the office today, back on Monday.

Thanks,

Molly

Subject: RE: PG&E's Advice 4392-E (Service List Advice 4392-E Appendix A)

Importance: High

Today is July 3rd – 3 weeks after the commission meeting in which the Commission decided on the Resolution for the above-referenced Advice letter.

We have attempted numerous emails and telephone calls in an attempt to get an update from various CPUC staff in the last 3 weeks with not one response.

The parcel in question is a **flood control levee**.

A Construction schedule that began June 1, 2014, by the U.S. Army Corps of Engineers and local flood protection partners to repair the levee is about to be **completely** compromised.

Federal and local monies set aside for this levee repair will also be compromised.

Important and necessary flood protection efforts will be delayed indefinitely on this section of the levee.

This is an El Niño year meaning there is a greater likelihood of this being a wet winter.

Hello Ms. Borak,

I believe last Thursday, June 12, 2014, was the day that the Commission decided on the Resolution for the above-referenced Advice letter. Please let me know as soon as possible how it went and what our timeline is in terms of receiving a written confirmation of the Commission's decision. As I've mentioned before, the acquisition of the easement that is the subject of the advice letter is vital to a flood protection project that is now underway.

Best Regards,

Thomas M. O'Neil
