Hi Raffy,

Just checking in on this—any updates on what the plans are for the July 30 report? I'll be on vacation next week, so please feel free to Meredith with anything further.

Best,
[Reda]

Hi Raffy

Thanks for sending this. What do you mean with respect to remedial action plans and activities? I'm guessing that you are interested in understanding when tree work has been identified as needed through our inspections, you'd like to know when that work has been completed? Is that right? Our team tracks the percent of trees needed work vs work complete per division on an ongoing basis, so you'd be able to see that sort of progress from one quarter to another. Is that what you had in mind?

Thanks and have a great 4th of July.

Best,
[Reda]

For each quarter, starting with the second quarter of 2014, please provide SED within 30 days of the end of the quarter, a summary report of activities your company has engaged in to minimize vegetation contact related fires. The report you provide should, at a minimum, demonstrate compliance with vegetation management standards required by the Commission, FERC and CalFire. Examples of data you provide in the report are inspection and patrol aggregate data, quality assurance/quality control work summaries and remedial action plans and activities. Our intent is to give each utility the ability to customize the report based on its unique operations and vegetation management practices with the overall goal of giving SED a snapshot of the activities and the opportunity to investigate specific areas further if necessary.
