Subject: RE: ED Report on PG&E's Failure to Transition Ag Customers to TOU Rates - Maintaining revenue neutrality for PG&E's Ag customer class

Good afternoon,

After speaking with Sid Dietz, I'm inquiring as to how revenue neutrality for PG&E's Ag class will be maintained given that additional revenue was generated from not transitioning customers to TOU rates. Would this be reflected in PG&E's annual true-up filing next year? If so, would a rate decrease or bill credit be used as a potential tool for resolving the discrepancy? Given the urgency to finalize Energy Division's report, if you could provide details on PG&E's plan for addressing this issue by tomorrow it would be greatly appreciated.

Thanks,
