> Hello all,

> I'd like to follow up and see if someone from PG&E would be able to participate on a second panel around 1pm in the afternoon titled "Forest/Public Safety/Water Management/Bio Fuels & water for Hydro & other water needs"

>

> Specifically, the Commissioner wants to look at the ability of communications technology to better manage the watershed, so it is capable of producing more water for hydro or other purposes, and so we can also harness biofuels and prevent fires. She'd like to know what the utilities are doing to take a holistic view of watershed management, and what they are doing to work with others in relation to hydro, utilizing biomass, and protecting safety. For example, with more wild fires the IOUs may have to de-energize lines more frequently. Please let us know if you'll be able to send an additional panelist.

> Hi Brian,
> As you may know, on September 10th Commissioner Sandoval is holding a workshop called "Communications-
Water-Energy Nexus". The draft agenda is below and times may shift a bit, but for the most part the panel topics
are listed. On behalf of Commissioner Sandoval and her office, I would like to invite a PG&E representative to
participate on the "Pumping, irrigation efficiency and water management through communications & information
technology" panel at 10:45 am. I am hopeful that this topic is something PG&E can contribute 5-7 minutes.
>
> Please reply back to Valerie and myself with confirmation or any questions. If you have a powerpoint, we will
need it sent to us by NOON, Monday September 8th. Thank you. We look forward to hearing from you.
