Subject:

The California Independent Systems Operator (ISO), California Public Utilities Commission and California Energy Commission staff will conduct an energy storage roadmap workshop to review and solicit feedback from stakeholders on barriers facing energy storage in California.

**September 4, 2014**

**10 am - 4:30 pm**

**California ISO**

**250 Outcropping Way**

**Folsom, CA 95630**

The California ISO, California Public Utilities Commission, and California Energy Commission are partnering to develop a joint energy storage roadmap that will advance California's energy storage. This roadmap will identify barriers and potential solutions with respect to policy, technology, and processes faced by the energy storage sector. It will also identify and suggest priorities for addressing issues, and note the appropriate venue to address them. This effort includes conducting surveys, individual stakeholder interviews, and collaborating with industry groups. This is not the forum to solve issues; however, it offers a way to document the scope and scale of what must be done to bring energy storage on line in California. Stakeholder participation is essential and will provide input to each agency's respective processes. The roadmap is expected to be completed by the end of 2014.

The September 4 workshop seeks to better understand the barriers identified in the initial outreach and gather additional input and clarifications. This interactive workshop plays a critical role in mapping out the key building blocks required to facilitate energy storage in California.

Information about the workshop will be posted on the California ISO website as it becomes available. <http://www.caiso.com/informed/Pages/CleanGrid/EnergyStorageRoadmap.aspx>

The roadmap team invites stakeholders to communicate by e-mailing  
[EnergyStorage@caiso.com](mailto:EnergyStorage@caiso.com)

**Please respond by August 28, 2014 via this link ( <http://www.rsvpbook.com/esrw2014> ) to express your intent to participate in person or via web and teleconference. Web and call-in information will be emailed after registration ends and will be published on the ISO website listed above.**

Please note that this email is sent to you as part of the CPUC service list for one of the following proceeding: A.14-02-006 - Storage procurement; R.13-12-010 – LTPP; R.10-12-007 - R21 /Interconnection; R.13-09-011 - Demand Response; and/or as part of the CAISO contact lists for electric vehicles and demand response; and/or as part of DNV GL's contact list for energy storage stakeholders.
